Net income per share (yen)	49.5		46.95				46.01		

#### Main points

**Net Sales** 

• KM SEIKO Co., Ltd. and Pinning Co., Ltd., which became consolidated subsidiaries in April 2022, and Nittoseiko Analytech Europe GmbH, established in Germany in April 2023, contributed to business performance. In addition, sales of fastener products for the automobile, housing, and construction industries, and control products such as analytical instruments for the chemical and pharmaceutical industries showed growth, resulting in a 1.6% YoY sales increase.

Operating Income

• Operating income declined 10.8% YoY due to the significant impact of sluggish orders caused by the slowdown of the U.S. and Chinese economies, despite sales price revisions and cost reductions in both production and sales operations in response to soaring resource and raw material prices.

**Overseas** 

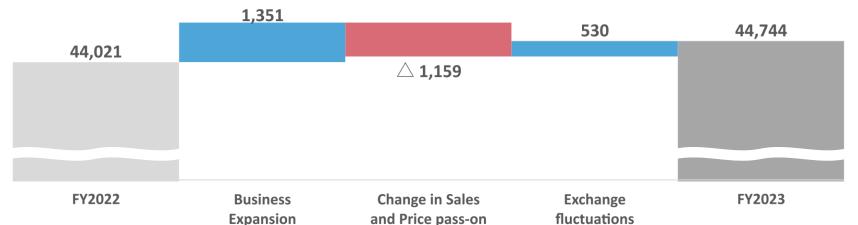

• Overseas sales declined slightly due to the slowdown of the U.S. and Chinese economies as well as prolonged inventory adjustments by customers in Southeast Asia.

#### **Summary of Financial Results - Net Sales**

Million Yen

#### ■ Change in net sales by segment

Business Expansion

Change in sales

Price pass-on

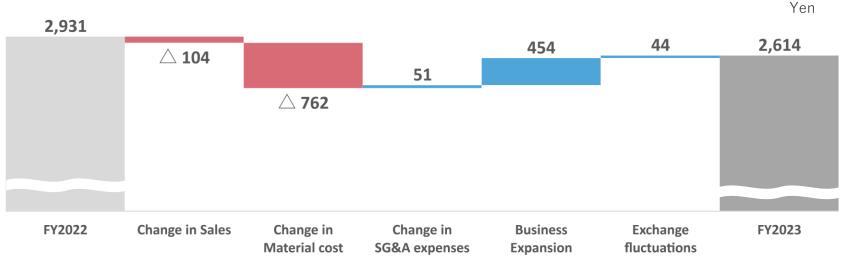

KM SEIKO Co., Ltd., Pinning Co., Ltd. and Nittoseiko Analytech Europe GmbH contributed to business performance.

Sales decreased due to the slowdown of the U.S. and Chinese economies and prolonged inventory adjustment by customers in Southeast Asia, despite strong sales in the automobile and chemical/pharmaceutical industries.

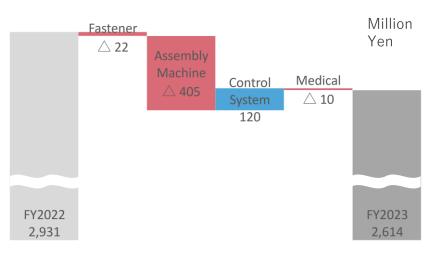

Efforts to promote price pass-on in response to soaring material costs encountered difficulties.

## Summary of Financial Results - Operating Income

#### ■ Change in Operating Income by segment

Material cost

Material cost and SG&A expenses

Business Expansion

Efforts to promote price pass-on in response to soaring material costs encountered difficulties. Material cost increased by 1.7% YoY, up 493 million yen.

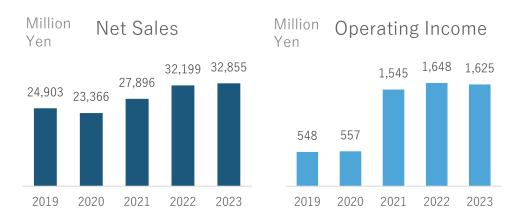

Million

Energy cost increased by 7.6% YoY, up 69 million yen.

KM SEIKO Co., Ltd., Pinning Co., Ltd. and Nittoseiko Analytech Europe GmbH contributed to business performance.

#### **Overview of Results by Segment - Fastener Segment**

- Net sales increased due to strong demand from the housing and construction sectors in North America, in addition to the mainstay automotive sector.
- Operating income decreased due to difficult negotiations to pass on higher prices for energy and subsidiary materials, despite efforts to improve efficiency and reduce costs by consolidating manufacturing plants.

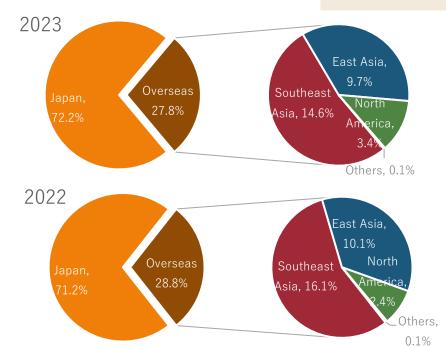

#### Net Sales by Industry

Unit: Mil yen/ %		2022/12 2023/12 Full Year Full Year		YoY

#### ■ Net Sales by Region

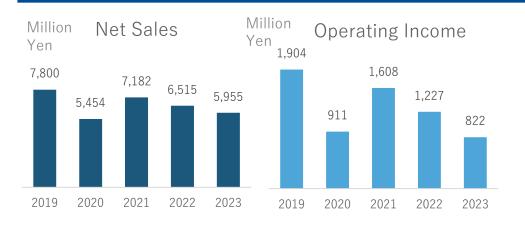

North America +330Mil Yen

6

#### Overview of Results by Segment – Assembly Machine Segment

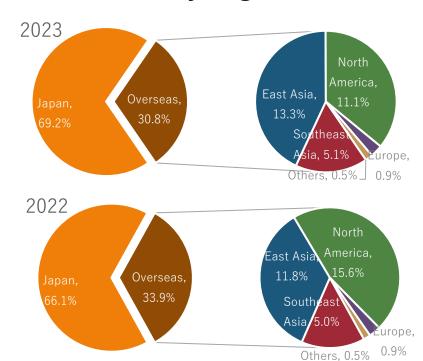

- Net sales decreased due to sluggish orders, especially in the U.S. and China, with increasing uncertainty in the global economy pushing down the appetite for capital investment, despite growing momentum for automation against a backdrop of demand for electrification and labor shortages.
- Operating income decreased due to lower orders for special machines and low orders in the U.S., despite efforts to pass on selling prices of standard machines.

#### ■ Net Sales by Industry

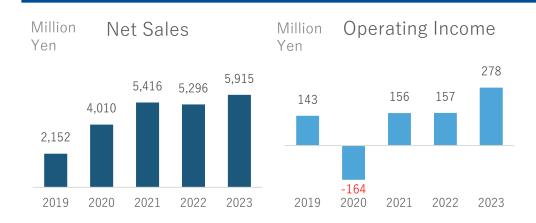

Unit: Mil yen/ %		2022/12 2023/12  Full Year Full Year		YoY		
		Amount	Amount	Amount	% Change

	Others	1,163	748	△ 415	△ 35.7	

#### ■ Net Sales by Region

#### Overview of Results by Segment – Control System Segment

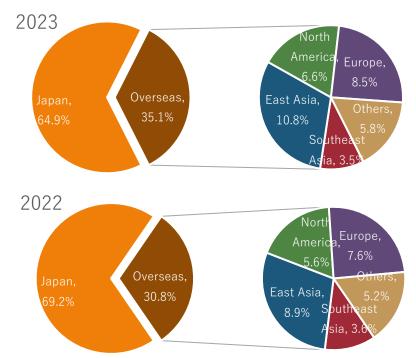

- Both net sales and operating income increased due to strong demand for flowmeters, and increased sales of analyzers at new branches in Europe.
- sales of analyzers increased due to a recovery in demand and the resolution of parts shortages after the corona pandemic.

#### Net Sales by Industry

ROIC	5.3%	8% or more

#### **Analysis of Cost-of-Capital Management**

#### Issue

#### **1**Operating income ratio

High product costs and market competition have resulted in weak operating income ratios.

#### Action

- Invest strategically in growth markets
- Improve management efficiency
- Expand into new businesses

Achieve the target operating income margin of 8.6% since 2019.

#### ②Return-on-capital ratio

Return on capital is below cost of capital (WACC 6.7%) and deviates from market expectations

- Use management resources effectively
- Pursue investment returns
- Reduce capital cost

Early realization of ROE 9 % ROIC 8 %

#### ③Dialogue with the capital market

Dialogue with the capital market needs to be enhanced and intensified to further increase corporate value.

- Stable dividend payout ratio
- Enhance dialogue with shareholders
- Enhance disclosure in English

Achieve and maintain a P/B ratio of 1.0x or more

Implement initiatives for each of the 3 issues in the 4 key strategies of Medium-Term Management Plan Mission G-second

## Actions to achieve management with a focus on cost of capital and stock price

#### Action

#### **1**Operating income ratio

- Invest strategically in growth markets
- Improve management efficiency
- Expand into new businesses

#### 2 Return-on-capital ratio

- Use management resources effectively
- Pursue investment returns
- Reduce capital cost

#### 3 Dialogue with the capital market

- Stable dividend payout ratio
- Enhance dialogue with shareholders
- Enhance disclosure in English

#### Growth#1 Business Expansion Strategy

Result by Growth Target

Sales ratio	CASE-related business	Non-Japanese companies	Overseas sales	Expand business sectors
Target FY2023	25.4%	11.2%	33.6%	7.2%
Result FY2023	20.7%	12.2%	28.0%	6.7%

Provide solutions to customers with anticontamination screw fastening machines to meet the demand for computerization accompanying advancement of CASErelated businesses.

CASE-related sales 1,608Mil Yen

Sales ratio target 25.4% ⇒ Result **20.7**%

## Non-Japanese companies

Received orders for large EV-related projects, mainly for South Korea.

In addition, we are expanding sales in Europe along with the fastener business.

YoY (Korea)

+175Mil Yen (+56.1%)

#### Overseas sales

Focusing on the European market, the Company is proceeding with CE marking, RoHS, etc., which will serve as the foundation of its business.

In addition, we will enhance the product lineup with a focus on specific countries.

## Expand business sectors

Developed a lightweight singleaxis screw fastening unit with a downsized robot that contributes to CO<sub>2</sub> reduction with lower power consumption.

We will continue to focus on introducing new products that contribute to reducing environmental impact.

Weight 30%Down

Contribute to
CO<sub>2</sub> reduction

Result by Growth Target

Sales ratio	Environment business	Semiconductor/ Food market	Overseas ground survey	EV/LIB business
Target FY2023	4.5%	0.2%	1.3%	4.8%
Result FY2023	4.5%	1.2%	0.0%	3.6%

A wide variety of flowmeters to precisely meet the needs of the field. Among them, high-performance mass/magnetic/ ultrasonic flowmeters guarantee reliability.

Development of a new product with a larger measurement range and higher accuracy than the conventional product is ongoing.

Sales related to semiconductor/food **77Mil Yen** 

Sales ratio target 0.2% ⇒ Result **1.2**%

#### **EV/LIB** business

#### **MISTOL AI**

Released a new AI-equipped model in the inspection and sorting equipment MISTOL series. It enables higher-performance parts inspection and contributes to automation, especially in the automobile industry.

#### Overseas ground survey business

As the next step for the industry standard product, with a dominant market share in Japan, we aim to promote it in Southeast Asia, focusing on the Thai market.

The "liquefaction determination method using SDS test results" has been approved by a third-party review organization, and expectations are high for its use in disaster mitigation.

Exhibited at EV and LIB related trade shows for PR.

The automatic powder resistance measurement system is ideal for evaluation of electronic materials such as electrodes for batteries, which is a growing field.

Growth#1

• Business partnership leading to expansion of business segments

**Environment business** 

Development of organic solvent recycling and recovery equipment

August 11, 2023 Launched a business alliance with eSep Inc, which has "Membrane separation technology".

#### Commercialization toward a carbon-neutral society

#### Sales plan: from 2025 approx. 120 million yen /year

## Carbon offsetting Carbon neutral Carbon neutral Carbon neutral Reduce CO<sub>2</sub> Decarbonization

Organic Solvent Recycling Equipment \*Image

#### ■ Features

- Improved recycling recovery.
- Reduced energy consumption by eliminating the need for conventional recycling processes (combustion and distillation) due to reduced liquid waste.
- Reduced energy cost
- Reduced CO<sub>2</sub> during recycling collection

#### Comparison with conventional process

	Distillation Type		Absorption Type		Membrane Type	
Facility Size	Large	×	Medium, multiple	Δ	Small	0
Operability	Continuous process	0	Batch process	Δ	Continuous process	0
Energy Consumption	Major consumption	×	Medium	Δ	Most energy-efficient	0
Total Cost	Large	×	Medium	Δ	Small	0
Market Share	50%	0	30%	Δ	Preparing for Commercialization	Δ
Cons	Cannot use heat- sensitive materials	×	Decrease in adsorbent performance	Δ	Cost of membrane	Δ
Overall Evaluation	×		Δ		0	

#### World's first!

## High purity, bio-soluble magnesium for medical use

#### Fracture treatment implants

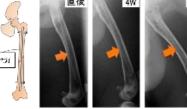

#### **■** Features

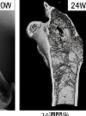

- High purity magnesium of 99.95% or higher, an essential element for humans and extremely safe.
- Starts dissolving after a certain period of time in the body, and then slowly dissolves completely over a long period of time.

## State of progress Development Non-clinical test trial Application Approval sales

#### **Development status**

- Non-clinical study initiated at a university hospital
- Research presentations at various academic conferences
  - Oct 2022 Collaboration with Dr. Yoshinobu Oka, Kyoto Prefectural University of Medicine
  - Nov 2022 Member of Medical New Business Department
- Biological safety and non-clinical studies are underway.
- Currently selecting implants suitable for these studies.
- System development for QMS, bioethics, information disclosure, etc.

24週間後 CT写真 (84例)

#### **Establishment of mass production system**

- Investment in facilities for mass production.
- Confirmation of quality and performance stability.

Growth#1

• M&A leading to expansion of business segments

#### Acquired a manufacturer of cold headed parts (bolts, nuts, etc.) in India

Company Information					
Company Names	Vulcan Forge Pvt. Ltd. Vulcan Cold Forge Pvt. Ltd.				
Business	Design, manufacture and sales of forged parts				
Sales Destination	Automobile and motorcycle industry, agricultural machinery industry in India				
Office Location	①Manesar (Gurugram District) ②Bahadorabad (Haridwar District)				
No. of Employees	292 (As of July 2023)				
Net Sales (Consolidated)	752 Mil INR(1,369 Mil Yen) Year ended March 31, 2023 **1INR=1.82JPY(As of February 20, 2024)				

product lineup

**Gurugram Province**: More than 50% of Japanese companies, including Suzuki's subsidiary companies, are located in this province.

#### Strength of In-House Integrated Production

In-house production from wire drawing, heading, rolling, plating, inspection to secondary processing.

Manufacturing and sales of NITTOSEIKO products in India

Strengthen Group

**Technology Expansion of** 

Sharing sales channels to non-Japanese companies

Sharing purchasing channels

#### **Business Expansion Strategy**

Acquired a manufacturer of cold headed parts (bolts, nuts, etc.) in India

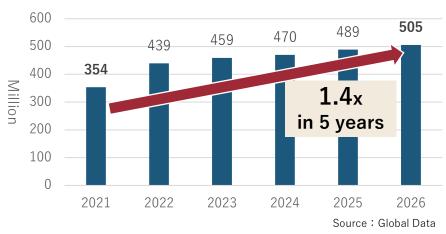

#### Expectations for growth of the fourwheel and EV markets in India

**Vehicle Production in India by Category** 

## Indian government is actively promoting EVs

"By 2030, 30% of all new passenger cars on the market will be FVs."

Expect growth of the four-wheel market

## Leading Japanese automakers announce production increase in India.

2026 Increase production line of electric vehicles2028 Construction of new four-wheeled vehicle plant

Expect expansion of the EV market

#### **Growth#2** Environmental Strategy

Target FY2030

CO<sub>2</sub> Emissions

#### Result FY2020-2023

Result FY2023

**▲**16.8%

(Compared to 2019)

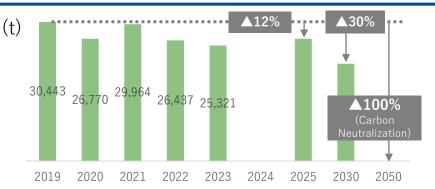

- Installation of Solar Panels (Malaysia)
- Switch to LED lighting
- Switching to renewable electricity
- Measures to improve operating efficiency of production and maintenance
- Other power saving measures

Solar panels (Subsidiary in Malaysia)

Solar Panels (Ayabe Assembly Machinery Plant) → Achieved 100% Green Energy

#### Plan of Initiatives till 2030

**▲**30% Installation of solar panels Feb 2024: Thailand Fastener Plant (Compared to 2019) Winter 2024: Ayabe Fastener Plant

 Reduction of electricity and transportation costs due to new factory construction and layout changes

Ayabe Fastener Plant Restructure Plan

#### Waste

Result FY2023

**▲**19.0%

Target FY2025

(Compared to 2019)

Waste volume remained flat due to an increase in the number of manufacturing bases following M&A. Promoting reduction of alkali waste and plating sludge, and conversion of waste plastics into solid fuel and reduction of their volume.

#### **ESG** support for customers

Cold headed parts

- Expansion of TAPTITE product lineup
- Diversification of dissimilar metal joining
- Lightweight parts fastening support
- Conversion from machining to cold heading
- Development of new fastening technology

**Assembly** Machine

- Weight reduction of products Improving energy efficiency of products
- Promoting automation Sales of environmentally friendly products
- Improvement of product precision

Medical Device

Commercialization of bio-soluble implants

#### **Growth#3** Human Resource Strategy

Labor productivity

Result FY2023

+0.3%

(Compared to 2022)

#### Platinum Kurumin

Certification by the Ministry of Health, Labor and Welfare for particularly excellent "childcare support" companies in accordance with the Law for Measures to Support the Development of the Next Generation.

Obtained in May 2023 (first certification in northern Kyoto Prefecture)

#### Strengthen investment in the education and training of global human resources

Actively recruit technical intern trainees and specified skilled workers. Strengthen the technical skills at local subsidiaries and appoint local leaders.

**Engagement score** 

Result FY2023

3.6pt

Strengthen capital cost management capabilities and group management capabilities

#### Transition to a divisional structure

NITTOSEIKO transitioned to a divisional business structure. Segment-based management system was put in place to strengthen group management control.

#### Renewal of 'Our Credo' handbook

Renewal of "Our Credo," an original textbook for human resource education. The textbook will be distributed to group companies to promote the philosophy and achieve the mid-term management plan.

#### Training to strengthen the cost of capital management performance

The educational video "N Library," in which employees serve as instructors, is being spread throughout the Group. Contents related to human resources strategy and financial strategy in the mid-term management plan are also included to strengthen the cost of capital management performance.

#### **Growth#4** Financial Strategy

GROWTH#4 Financial Strategy							
Result FY2022			Result FY2023			Target FY20	25
ROIC	5.7%		ROIC	5.3%		ROIC	8%以上
ROE	6.1%		ROE	5.5%		ROE	9%以上

#### Analyze return on investment in business expansion

#### Improve Fixed Asset Turnover

The Company will strengthen the system to check whether the investment effect is greater than the Group's WACC of 6.7% for capital investments aimed at improving profitability. In addition, on-site verification of fixed assets is underway. Idle or ineffective facilities will be identified to reduce taxes and assets.

#### **Acquisition of** treasury stock

2023

219Mil Yen/400k stocks

Acquired treasury stock to improve shareholder returns and capital efficiency, and to execute a flexible capital policy in response to changes in the business environment.

#### Effect of CMS on debt reduction

Interestbearing debt

Year Ended 2022

Year Ended 2023

2.99Bil Yen 1.93Bil Yen

Interest expense

FY2022 25Mil Yen 77Mil Yen

FY2023

Reduced interest-bearing debt through CMS. Plan to reduce 200 million yen of interestbearing debt in FY2024.

In addition, group funds will be utilized for highly effective investments, taking into account the cost of capital.

#### Main points

**Net Sales** 

• While the first half of this fiscal year is expected to remain weak due to inventory adjustments and the slowdown in economic growth in major countries, an overall group recovery is expected from the second half of this fiscal year as the excess inventory is being resolved and capital investment appetite is gradually increasing.

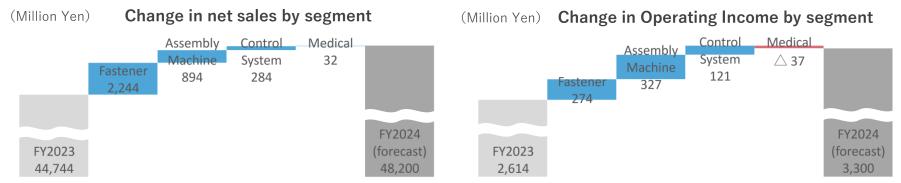

## Operating Income

 Plans to improve profitability by consolidating fastener factories and passing on material and labor costs to sales prices.

## **Net Sales and Operating Income Forecast by Segment** (Consolidated)

Business	Major market trend		Initiatives for this fiscal year	Changes in the balance of order backlog
Fastener	Automobile	EV-related demand is growing, and orders are expected to gradually increase toward the second half of the year.	The Company will work on reducing manufacturing costs innovatively, as well as passing on sales prices to	
Business	Housing and construction	Expectations for the renovation market, etc.	improve margins from soaring raw material costs.	2021 2022 2023
Assembly Machine	Automobile	Higher interest in capital investment is expected to continue in the CASE business.	For its mainstay screw fastening machines, the Company will introduce new products that can respond to environmental concerns and increasingly complex shapes	
Business	Energy sector	Demand for gas meters and electricity meters, areas of strength, is expected to increase.	to differentiate itself from competitors, and expand not only in the automotive industry but also in a wider range of industries and overseas markets.	2021 2022 2023

Improved productivity and quality, reduced CO<sub>2</sub> emissions

## New factory construction and layout changes

- 2023: 2<sup>nd</sup> construction Layout changes of Yata plant
- 2024: 3<sup>rd</sup> construction Partial transfer of headquarters plant to Yata plant (plan)

Renewal of equipment to improve processing quality

- 2023: Introduction of a vertical machining center
- 2024: Introduction of a multitasking machine and a machining center (plan)

### **Management Approach**

- We will carry on our management philosophy and enhance our corporate value by developing our business.
- We will be recognized and sought after by our stakeholders for the realization of a sustainable society.
- As a manufacturing solutions group, we will share our customers' materiality and strive to solve their issues.
- We will ensure a strong financial position to carry out all of these activities.

## NITOSEIKO

Forecasts of future performance contained in this document are based on information currently available to the Company and certain assumptions that the Company considers reasonable. Actual results may differ from these forecasts due to a variety of factors. Important factors that may affect actual results include, but are not limited to, economic conditions in Japan and overseas surrounding our business domain, demand trends for our products and services, exchange rates, and stock market trends. Factors that may affect our business performance are not limited to the above.
