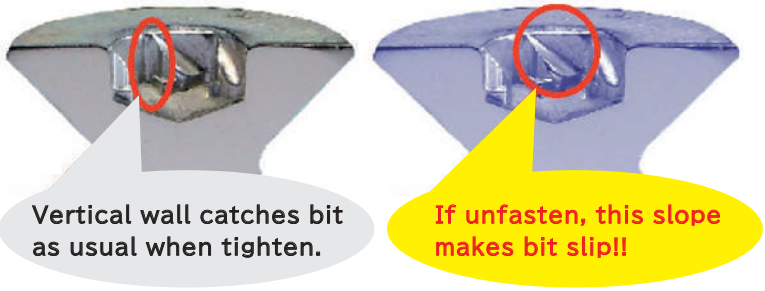
NITTOSEIKO

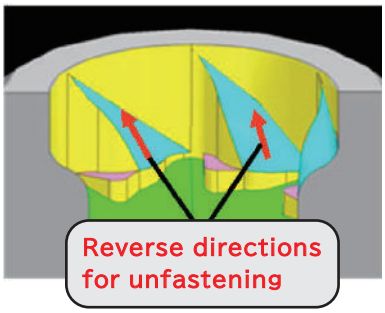
NITTOSEIKO' S TAMPER PROOF RECESS FOR SECURITY USE

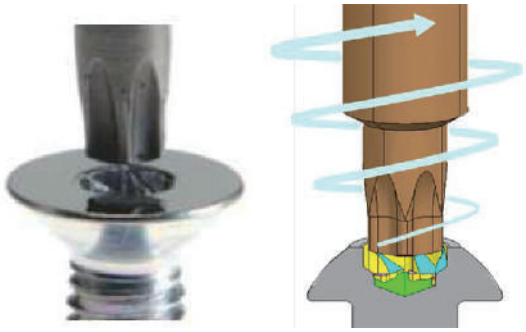
TORX® ONEWAY

Outline of TORX® ONEWAY

Security components of products are given have the function not to be disassembled by consumers because of insuring safety and quality. As one of the prevention ways, we have suggested a wide variety of screws that prevent handling or have undetachable structure. Screws should have a capability of security products now. However, dedicated tool can not actualize interactive work with convenience. NITTOSEIKO's TORX® ONEWAY has been developed to solve such problem.







Special features

- Makes bits slip when rotated reversely.
- Can fasten by the conventional TORX® bits.
- Eliminate slip of bits and drive workability when tighten.
- Slopes give excellent insertion property than TORX®.

Application

- Automobile lock
- Gas meter, etc.
