Subject : Invitation to HANNOVER MESSE 2022

Dear Sir and Madam,

We are pleased to announce that we will be exhibiting at HANNOVER MESSE 2022 in Germany to introduce our products.

In our booth, we will exhibit fastening solutions for "Weight Saving", "Cost Reduction", "Battery terminals", "Contamination issues", and so on.

As our booth will have a corner to "See and Touch", you will be able to know how our solution will give you benefits.

- Session : May 30, 2022 - June 2 9:00~18:00
- Venue : Messegelände D 30521 Hannover, Germany
- Booth Location : Hole No.6 (Automation, Motion & Drive exhibit area), Booth No. F48
- Exhibits :
 1. **GIZA TITE** - Selftapping Screw for Plastics Applications
 2. **COLLARLESS TITE** - Selftapping Screw for Plastics Applications
 3. **ALUMI TITE** - Selftapping Screw for Aluminum Applications
 4. **CP-GRIP** - Special Coating solution for Contamination
 5. **Clinching stud bolt** – Self-clinch Stud for Sheet Metal
 6. **AKROSE** - Joining Technology of Dissimilar Materials
 7. **SR565Y0-Z** – Blow Feed Screw Tightening Robot with Anti-contamination Unit
 8. **AD100T** - Screw Tightening Driver with Balanced Arm
 9. **PD400UR-V** - Screw Tightening unit to be mounted on UNIVERSAL ROBOTS

You can also get information about our products on the Deutsche Messe website below.

<https://www.hannovermesse.de/exhibitor/nittoseiko/N1479576>

Please refer following pages for information about the location of our booth and tickets.

We are looking forward to seeing you at Hannover.

Sincerely,

Masami Zaiki
President
NITTOSEIKO CO., LTD.

<Demonstration and See & Touch Corner>

● Screw Tightening Robot with Anti-Contamination Unit & CP-GRIP

As solutions for contamination (dust, debris etc.) sensitive applications such as electronic devices and precision parts, we will display following products.

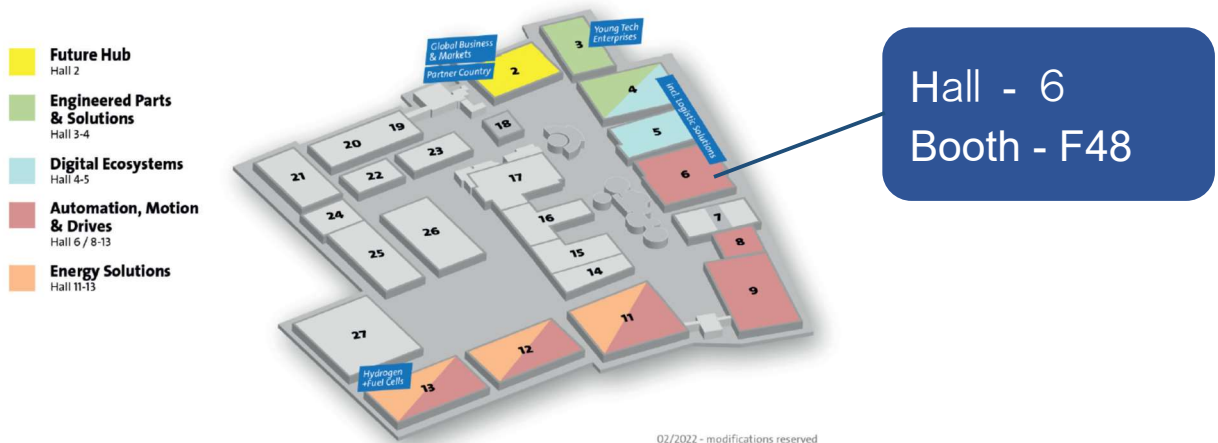

SR565Y0-Z, a Blow Feed Screw Tightening Robot with Anti-contamination Unit which vacuums particles on screw surface just before screw tightening.

CP Grip, a micro capsuled special coating sticks and merges contaminations like metal chips and debris on female thread.

● Screw Tightening Driver with Balanced Arm

You can feel how our product works by using “Screw Fastening Driver with Balanced Arm” which allows you to position the screw as you desire.

By using the machine, you will also be able to know the performance of our special selftaping screws, GIZA TITE and ALUMI TITE.

<Invitation Tickets>

Invitation e-tickets issued by Deutsche Messe are available from following link.
